NOVARTIS

AD Product Manager, Drug Candidate Selection Software Applications

Job ID
REQ-10008985
Sep 03, 2024
Switzerland

About the Role

Purpose of the role:

As Product Manager Drug Candidate Selection, you play a leading role in defining the future of our suite of software applications used by over 2,000 scientists in BR to search, analyze, and visualize project data to derive insights and drive high-quality decisions in our drug candidate selection process – both for classical small molecules as well as new therapeutic modalities.

Key Responsibilities

You combine your knowledge of informatics and chemistry/biology applied to drug discovery with your matrix leadership skills to manage and evolve a high-impact product consisting of a portfolio of chemistry and new therapeutic modalities software applications. Together with a Product Operations Manager and an Engineering Lead, you will co-lead a matrixed product team, ensuring the initiatives you lead contribute to an intentional, integrated, and capability-based product architecture and continuously increase the value to drug discovery in BR.

- You provide scientific expertise to the product team, sharing a deep understanding of drug discovery data including how to integrate and visualize scientific data from multiple disparate sources (e.g. chemical structures, dose response, and structure activity relationships).

- You collaboratively provide strategic context and focus to the teams, act as facilitator to prioritization, and cultivate good team-based decision-making practice to increase the value of the Product towards the strategic mandate of your Product Line.
- You actively and transparently manage, and communicate to, all key stakeholders to co-create visions and roadmaps for the initiatives you lead, and you define how we measure their success and value delivery. This includes partnering with multiple providers as well as the large community of system users, meeting frequently with key stakeholders to set the product roadmap.
- You shape your teams' culture and processes for success by exemplifying excellence in leadership and product management.

Role Requirements

- Leading effectively in a co-leadership model inside of a global matrix organization.
- Ability to effect change, manage conflict, and create alignment through direct and indirect influence.
- Creativity in identifying, encouraging, and accelerating innovative solutions.
- Domain expertise in core drug discovery disciplines such as chemistry and new therapeutic modalities

(e.g. xRNA, RLT, complex biologics).
- Experience in managing complex suites of interdependent scientific applications and data sources.
- Experience with chemistry related data management, analysis, and visualization in a drug discovery setting.
- Agile mindset and experience with Agile software development.
- 7+ years of experience in an informatics related role in a drug discovery matrixed environment.

Why Novartis: Our purpose is to reimagine medicine to improve and extend people's lives and our vision is to become the most valued and trusted medicines company in the world. How can we achieve this? With our people. It is our associates that drive us each day to reach our ambitions. Be a part of this mission and join us! Learn more here: https://www.novartis.com/about/strategy/people-and-culture

You'll Receive: You can find everything you need to know about our benefits and rewards in the Novartis Life Handbook. https://www.novartis.com/careers/benefits-rewards

Commitment to Diversity & Inclusion: Novartis is committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.
