

Site Engineering Head / Directeur Ingénierie et Maintenance (m/f/d)

Job ID
REQ-10016880
Oct 30, 2024
France

About the Role

Key Responsibilities:

- Develop and maintain technical site strategy plan (Capex Plan, recapitalization of equipment, obsolescence management, budgeting, etc.) and oversight of its implementation.
- Set objectives and proactively manage the performance of the Engineering department.
- Ensure availability of competent, high performing people and develop the talent pool.
- Ensure the inspection readiness of the Engineering department; support audits and inspections.
- Establish cost-efficient repair and maintenance processes in compliance with local regulations, Health, Safety, and Environment (HSE) standards, and Good Manufacturing Practices (GMP).
- Account for technical availability, reliability, and condition of production plants and infrastructures
- Define and execute asset strategy and proper asset lifecycle management. Support innovation, data and digital site initiatives, and state-of-the art technology to support productivity journey.
- Develop with procurement, the required strategy and framework to manage vendors / contractors, ensuring the best service at a competitive cost
- Teams in charge of Process Maintenance, Operation and maintenance of Utilities, Project Engineering, Asset Lifecycle Management, Commissioning and Qualification, Automation, Facility Management, Business Development.

Essential Requirements:

- Degree in engineering (Dipl. Ing. / M. Sc. / B. Sc.) or equivalent
- Leadership experience: line management of large group (>100p) with several management layers and/or successful project management of major investment projects. Seasoned financial acumen.
- Excellent project management skills including contract management and project appraisal / financial knowledge.
- Excellent communication skills, ability to effectively present complex ideas and solutions to executive management, technical experts and regional / local teams. Strong stakeholder management skills to liaise and collaborate with global partners.
- Strategic thinking. Strong ability and resilience to embrace and facilitate change. Pragmatic and committed.
- Fluent in English and French

Desirable Requirements:

- Ideally, in-depth technical knowledge in chemical and / or pharmaceutical processes and equipment
