NOVARTIS

Associate Director IT Solution Delivery Data

Job ID
REQ-10026564
Nov 14, 2024
Spain

About the Role

About the Role:

- Develop a strategic capability to create product/services roadmaps from concept to development to launch, encompassing technology adoption, product engineering, service design, security and compliance, and business process change.
- Incubate and adopt emerging technologies and launch products/services faster with rapid prototyping & iterative methods to prove and establish value. For identified technologies, launch to enterprise scale, ensuring value is derived.
- Focus and align innovation efforts with the Business strategy, IT strategy, and legal/regulatory requirements.
- Establish and update strategies, implementation plans, and value cases to implement emerging technologies.
- Drive innovation using appropriate people, processes, partners, and tools.
- Identify and develop digital capabilities & ecosystem partnerships in alignment with Digital strategy and in support of TSA and Enterprise Innovation.

Key Responsibilities:

Your responsibilities include, but are not limited to:

- Has end-to-end accountability for services and products that are incubated, established, and delivered across cross-functional business areas.
- Serves as point of escalation, review, and approval for key issues and decisions
- Steers the Solution Design
- Take decisions on the resource and capacity plans in line with Business priorities and strategies and close collaboration with delivery teams
- Decides on continuous improvement within the team
- Decides on the program timeline, governance, and deployment strategy

Commitment to Diversity & Inclusion:

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

Essential Requirements:

- University Degree and/or relevant experience and professional qualifications
- Track record delivering global solutions at scale

- Ability to work and lead (a cross-functional team) in a matrix environment
- Solid understanding of Analytical and technical frameworks for descriptive and prescriptive analytics.
- Solid understanding and knowledge of data product solution design in a cloud environment
- Awareness of Data product change Management and risk mitigation.
- Monitoring and improving data product service delivery offerings.
- Strong collaborative interactions with customer-facing business teams.
- Strong communication and stakeholder management, ideally with a consulting background.
- Data product-centric approach to defining solutions. Collaborate with business in gathering requirements, grooming product backlogs, driving delivery, and ongoing data product enhancements.
- Agile delivery experience managing multiple concurrent delivery cycles.
- Sound understanding of Data Design, Data Science, AI (GenAI) concept and principles
- Sound foundation in Analytical Data life cycle management
